

FIS Treasury & Risk Solutions Win Big at the 2025 Treasury Management International Awards for Innovation & Excellence

March 25, 2025

Key Facts

- FIS won the Best Cash & Treasury Management Solution award and the Solution Innovation in AI award in the Technology & Innovation category at the Treasury Management International 2025 Innovation & Excellence awards.
- The recognitions celebrate FIS' Treasury and Risk Manager, Integrity Edition; as well as its recently launched Treasury GPT generative AI tool.

JACKSONVILLE, Fla.--(BUSINESS WIRE)--Mar. 25, 2025-- [FIS](#)[®] (NYSE: FIS), a global leader in financial technology, announced today that it has won two awards at the [2025 Innovation & Excellence awards](#) from Treasury Management International. In the Technology & Innovation category, FIS won the Best Cash & Treasury Management Solution award for its [Treasury and Risk Manager, Integrity Edition](#) ("Integrity") solution. FIS also won the Solution Innovation in AI award, celebrating its recently launched [Treasury GPT](#) generative AI tool.

The awards illustrate FIS' commitment to investing and innovating in solutions for money in motion and at rest, with its vision of unlocking financial technology to help businesses effectively manage liquidity by moving money quickly and at scale, from making payments, to paying down debt or investing.

"Today's treasury management professionals are being faced with an array of modern challenges, not least of which includes an increasing pressure to have holistic and real-time visibility into their liquidity," said J.P. James, Head of Treasury and Risk at FIS. "These awards prove that FIS is helping treasurers meet these headwinds—not just by building market-leading and tech-forward and AI-based products. Our team is immensely proud of this recognition and congratulates other recognized companies."

Why Real-time Cash Visibility and Management Matters

According to the [2023 Global Treasury Survey](#) from PwC, 100% of corporate treasurers and 97% of CFOs feel that cash and liquidity management are a priority topic, and respondents ranked "inaccurate forecasting & visibility" as their top challenge. FIS' Integrity solution leverages powerful and scalable cloud-native technology to offer a single modern treasury platform that connects to banking, trading, and business systems—ultimately helping users to unlock real-time cash visibility, holistic risk mitigation, and a clearer path to growth.

Embedded within the solution is FIS' newly launched Treasury GPT. This AI-powered tool is the first large language learning model dedicated to FIS Treasury Management solutions and one of the first for the treasury industry as a whole. In collaboration with Microsoft, the tool uses the Microsoft Azure OpenAI Service to quickly generate responses to queries on platform configuration, product information, and best practices for its use.
