FIS Positioned as a Category Leader Across All Five Credit Lending Operations Quadrants in Chartis Research Report

July 10, 2025

Key Facts

- FIS has been recognized as a Category Leader across all five quadrants in the Chartis Research 2025 Credit Lending Operations report.
- FIS was recognized in areas that included loan origination, loan management, and credit lending for alternative finance.
- The recognition illustrates FIS' leading position in providing innovative solutions for a market segment increasingly crucial to driving the world's economies.

JACKSONVILLE, Fla.--(BUSINESS WIRE)--Jul. 10, 2025-- FIS® (NYSE: FIS), a global leader in financial technology, has been recognized as a Category Leader across all five quadrants in the Chartis Research 2025 Credit Lending Operations vendor analysis report. The recognition marks a significant achievement, underscoring FIS' commitment to innovation and excellence in unlocking leading-edge lending solutions.

The report evaluated the capabilities of vendors across loan origination, loan management, limits management, collateral management, and alternative finance solutions. Vendors were evaluated based on capabilities such as integration with upstream and downstream systems, adoption of cloud and low-code/no-code frameworks, and advanced analytics.

"Being named a Category Leader across all five major credit lending quadrants serves as a testament to the strength of our integrated platform and our unwavering commitment to driving results for our clients and their money at work," said Steve Sabin, head of Capital Markets Lending at FIS. "We are proud to help financial institutions adapt to a dynamic lending landscape with solutions that set the standard for scalability, efficiency and innovation."

In an increasingly uncertain economic backdrop, lending markets continue to be a crucial growth driver for modern economies. However, with complex market risks and costly processes to manage, fragmented and manual systems can impair a firm's ability to meet borrowers' needs, maintain customers and manage risk. By offering configurable, cloud-enabled solutions, FIS helps both traditional and alternative lenders to improve their processes across the lending lifecycle, providing greater trust and resiliency for a crucial segment of the world's money lifecycle.

Specifically, FIS was recognized for the following:

- **Loan Origination Systems (LOS):** Platform capabilities, product capabilities, and LOS processing; alongside advanced workflow management, adoption of advanced technologies, and analytical capabilities
- **Loan Management Systems (LMS):** Platform and product excellence, LMS processing, workflow integration, and credit risk analytics
- **Limits Management Systems (LiMS):** Robust platform design, advanced limits processing, credit analytics, and effective integration
- **Collateral Management Systems (CMS):** Tied for highest product capabilities score among all vendors
- **Credit Lending Operations for Alternative Finance:** Best-in-class performance across the board

"FIS' Category Leader status in our latest Credit Lending Operations Report reflects its deep domain expertise and strong global strategy, combined with an extensive suite of products in the lending space," said Anish Shah, research director at Chartis. "FIS stood out for its robust platform embedded with advanced data and analytical capabilities, which supports the loan lifecycle across a variety of loan types. Moreover, FIS' solutions enable firms to automate business processes by leveraging advanced technologies within a well-established ecosystem of partners."
